Supporting

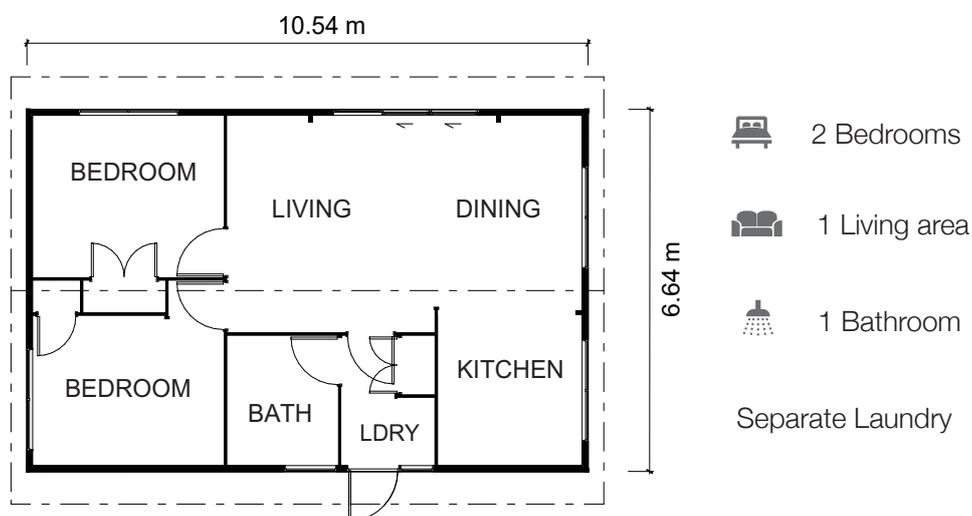

This Show Home is for sale!

The 70m² Lakeview has been built to showcase the next generation of Lockwood high-performance building, exceeding the requirements for thermal efficiency. The “NZ Natural” theme of the house supports NZ companies and locally sourced products, including our own Lockwood VG Pine, an eco-conscious choice grown and processed right here in the Bay of Plenty. The carpets are NZ wool, and the curtains are supplied by Russells, another proudly NZ-owned and operated company.

This home features a number of upgrades including high end kitchen finishes, with stone benchtops and Laminam splashback. A Velux opening skylight is installed in the living area. There is high quality wool carpet and curtains and blinds included in the price. Proceeds from the sale of this home will support Dancing for Hospice, helping Hospice Rotorua continue their vital work in the community.

The Lakeview show home is ready for your site now, talk to us about assisting with siting consents and transport to your site.

(Transport, decking, site consents and connections, on-site works, decks, furniture and accessories are not included in the price)
